

## Burns' Anniversary Is Fittingly Observed

Concert in Gordon Memorial and Auxiliary Banquet.

The anniversary of Bobby Burns, Scotland's beloved bard, was fittingly observed on two occasions here during the past week. Both occasions were well patronized and both were pronounced a huge success.

The first was last Friday evening when the Ladies Aid of Gordon Memorial Church gave a Scotch concert. The program opened with a piano selection by Mrs. Cairns. Solos were given by Robt. Pow, J. Hitchen, Miss Morrison of Medicine Hat, and B. Thacker; Mrs. Stone and Miss McWane sang a duet; eight laid highland costume sang a chorus and readings were given by Mrs. Shimmish, Mrs. Thacker and A. J. Learmonth. E. L. Stone sang a comic song. During the evening Mrs. R. E. Pow gave an interesting address on the life and works of the beloved poet. The concert was well patronized and so entertaining was the program that many signs of regret were apparent when the last item was announced. E. L. Stone acted as Chairman.

On Monday evening the Ladies Auxiliary to the Legion put on a Burns banquet in Cliff Hall for members of the local branch and their ladies. A splendid dinner was served at 6:30 after which the usual lists of toasts were proposed and responded to and several musical numbers introduced.

"The land which we live," was proposed by Mayor Worts and responded to by Mr. P. Lavelle.

A. J. Learmonth, proposed the toast to "Auld Scotia" and E. Baird responded.

"Our Empire," was proposed by J. Kichen and responded to by Mr. Henderson.

"The Leslies" was proposed by W. Campbell.

The toast to "The immortal memory of Burns" was given by E. L. Stone.

All the toasts were handled very capable but outstanding among them was that of Mr. Henderson who, despite his 93 years of age gave one of the most inspiring patriotic addresses of his long and enthusiastic public career. Having been born only a year after Queen Victoria occupied the throne, Mr. Henderson was able, as few men in Canada are able to do, to trace from experience and personal knowledge, the growth and development of "Our Empire" along all lines of Empire activities. His address was a treat and all who heard it were proud that even of Redcliff's "Grand old Gentleman."

During the evening Scotch songs were sung by Mrs. Balmer J. Hitchen and A. Patterson and A. J. Learmonth gave a favorite Scotch recitation of Burns' composition.

The banquet was brought to a close with the singing of "Auld Lang Syne" after which the evening set had a few hours of dancing.

At one stage of the banquet Mr. Hodge, who acted as chairman, presented Mrs. J. Kichen, president of the Ladies Auxiliary with the charter of their organization and he took advantage of the opportunity to remind the

## Council Holds Last Meeting of the Year

Councillor Brydie Tenders His Resignation.

The last Meeting of the present Town Council was held last Monday evening. Very little business of importance came before the meeting and what there was, was passed very quickly. Councillor Brydie, who has been on the council for several years tendered his resignation although he has one more year to serve. His resignation was accepted with regrets on motion of Councillors Shaw and Champ. Owing to a mistake in a lot recently sold by the town, the sale was cancelled and the secretary instructed to return the purchase price.

The secretary was instructed to have the auditors' report printed for distribution at the ratepayers' meeting called for Friday evening of this week.

There being no further business the meeting adjourned.

## Good Picture Coming To Cameo Theatre

Marking the most forward step yet made in the new art of pictures, "Alibi," United Artists underworld thriller, is coming to the Cameo Theatre next Wednesday evening.

No motion picture in recent years has aroused as much enthusiasm from audiences as "Alibi," for it gives an entirely new conception of film technique — the most thrilling part of any underworld story, and presents the greatest array of stage favorites ever assembled in one production.

"Alibi," adapted for the screen by C. Gardner Sullivan, is described as a powerful story of drugs, police, gay night life and love. Although heralded as a melodrama, the picture contains some of the biggest laughs of the year and also gives the world a couple of sensational new hits, played especially for the production.

A crop of hay arrived in town this week for farmers of the district.

**BOX SPRINGS NEWS**  
A very successful dance was held in Box Springs on January 23rd. The U. F. A. Hall was filled to capacity. Dunmore, Medicine Hat, Redcliff and Howell all well represented. Dutton's orchestra from Redcliff provided the music.

Lloyd Williamson who has been ill in Medicine Hat Hospital returned home Saturday, much improved in health.

George Simpson, of Bindass, formerly of Box Springs, spent a few weeks here renewing old acquaintances.

Misses Mildred Beale and M. Walker are spending this week in Dunmore visiting friends.

Owing to the dry weather, farmers in the district are having trouble to water their stock. A light snow will be welcomed.

gathering of the excellent work done by auxiliaries of the past and now being done by the present auxiliaries.

ROBERT BURNS

Scotland's honored, beloved, and revered poet, the anniversary of whose birth was fittingly observed here last Friday and Monday.

## COASTGUARD BOAT KILLS CANADIAN PILOT

A one-pound shell from a coastguard gun shattered the pilot house of the Hesperus-laden Canadian schooner, Josephine K., Saturday night, killing her Captain, William P. Cluett, of Lunenburg, Nova Scotia.

The schooner, \$500,000 worth cargo, and 15 men were seized. The coastguard also took charge of the garbage scow Brooklyn and the tug Dauntless No. 6, which were along-side the Canadian vessel when the coastguardsmen appeared.

The crew claims that the Josephine K. was outside the limit when fired upon. An investigation is being held.

John Fowles, of the Social Plain district near Empress has been elected U. F. A. director for this district.

## Nomination Day Here Next Monday

Ratepayers Should Have Candidates Picked Early.

The Review would again remind ratepayers that it is time for them to be making arrangements for candidates to fill the several vacancies on the Town Council and School Board, as nominations will take place at the Town Hall next Monday.

So little interest has been taken in this matter in the past that it has been quite a task at the last minute to get the necessary papers filled in and the required number of candidates in the field. But usually after it is too late there are those who always say: "If I had only known I would have done so and so."

Nominations must be in the hands of the returning officer between 11 and 12 o'clock. Pick your candidates and get your papers filled in early so as to avoid disappointment.

Mr. R. S. Hodge left Tuesday for Calgary on business in connection with the Dominion Glass Co.

When going home from the Burns Concert last Friday evening Mrs. McCleary had the misfortune to fall over a rough spot in her path and break her ankle bone. Mrs. McCleary was taken to the hospital where the bone was set. She is now progressing favorably.

## Chapter of Accidents Here in Past Week

All Serious Enough But None Proved Fatal.

There has been quite a chapter of accidents in town during the past week. While most of them have been serious enough it is fortunate that none have been fatal.

Little Ed, Rohmet was shot in the leg by the accidental discharge of a .22 rifle. The lad is at present in the hospital and although still carrying the bullet is out of danger and progressing nicely.

Roy Miller had his hip dislocated while playing at School. His injury is very painful but not considered serious.

While driving on a delivering rig in town Ted Maskell had the misfortune to fall off the wagon which passed over his legs. Although no bones were broken Ted got a bad shaking up and bruising. He is still using crutches but expects to be on his feet in a few days.

Evian Jones, who works in the Brick & Coal shale mine, had a large piece of shale fall on his foot, breaking one of the small bones.

And, as referred to in another column Mrs. McCleary broke her ankle bone by a fall on the street on her way home.

We are glad to report that all are progressing favorably.

## Local Jitney Man Held Up on Road

Has Desperate Struggle But Beats Off Two.

Last Saturday night Joe Bergeron, our popular jitney driver, had an experience which he will not soon forget. About ten o'clock he was returning to Medicine Hat for a load of his passengers when two strangers stopped him on Broadway and asked to be taken to the Hat. They both sat in the back seat and were the only passengers for the down trip. Arriving at the Empress trail crossroad, one asked Mr. Bergeron to stop the car. This he did and as one got out the other grabbed Joe around the neck from behind. After a struggle Mr. Bergeron pried himself loose but on getting out of the car was attacked by the other ruffian. For about five minutes Mr. Bergeron fought desperately with the two yeggs and although attacked from both front and rear, he was able to fight them off and return blow for blow until another car drove in sight. This scared the villains and although they were groggy from Joe's sledging hammer blows, with the assistance of the other they both ran north over the rail way track and made their escape. The approaching car, however, did not heed Joe's signal for assistance and went on by. Mr. Bergeron had just enough strength left to crawl into his car and proceed to the Hat.

Fortunately the cowardly hold up men were not successful in their Villainous designs.

Mr. Bergeron has a good description of the men but so far the provincials have not been able to locate them.

The Intermediate C. G. T. Union will hold a Japanese Tea and sale of home cooking and work in Gordon Memorial Church from 3 to 5:30 P. M., Feb. 2nd. Everybody welcome and bring your friends.

Everybody welcome. A special invitation is extended to those who have no church home or do not attend any Sunday School.

ST. MARY'S CHURCH Celebration of Mass every Sunday of each month except the First Sunday, at 8:30 A. M.

## Quebec Sets Pace In Winter Sports

Winter sports, in the most historic city of the American continent—Old Quebec, cradle of New World civilization, with the Canadian Pacific Railway's beautiful Chateau Frontenac Hotel as headquarters, are again providing a drawing card for devotees from all parts of Eastern Canada and the United States.

The great hotel, with its long, fast toboggan-slides on Dufferin Terrace and its spacious skating-park that extends its doors, offers something unique in the way of comfort for sports-lovers. Quebec, too, boasts a fine ski-jump and plentiful opportunities for cross-country work either on skis or snowshoes. Curling, hockey and skating are also staples of the winter program, most events being rounded off with dancing in the evening.

The season is now in full swing; the International Snowshoe Carnival and the ice-canoe race across the St. Lawrence on January 31 and February 1; the famous Eastern Ice-skating on February 10, 20 and 21, followed by the traditional Masquerade Ball in the Chateau Frontenac's grand ball-room, being among the high-lights.

For picturesque, Canada's Ancient Capital can hold its own with any city in the world and the surrounding countryside offers a host of opportunities for excursions. Snow conditions, following the great January storm, are reported excellent and those who have visited the Chateau Frontenac, either in winter or in summer, are loath to leave for home without its accommodation and cuisine is indeed well-earned. The picture story above is a typical day-long and right, the majestic Chateau Frontenac, towering over Quebec's Lower Town; upper centre and lower-left, ski-jumpers and skiers; below, visitors out for a run in the alders along middle-left; are typical of the young Quebec taken to winter sports, which have become famous throughout the American continent and bring visitors and competitors over Canadian Pacific lines from coast of the larger centres of Eastern Canada and the United States.

## Cool Heads and Clear Thinking

There are times that test men. In the present economic conflict raging throughout the world, men are being put to the test just as truly as they were during the stress and strife of the Great War. There is tragedy and suffering now as there was then, and because of these conditions men are being tested. They are very apt to allow their usual habits of thought and action to slip their moorings and to indulge in unconsidered, reckless thought, passion and action under impulse. They must not only refuse to countenance in themselves but would condemn in others.

It is well that people should give serious consideration and study to the existing situation, not merely as individuals but as a community in the interest of the welfare of all. It is well that difficulties should be made known, that just grievances should be clearly stated, that suggested remedies should be outlined, discussed, and, in the light of the circumstances, action taken. Therefore, the many meetings being held throughout the country are a gratifying sign of an aroused public interest in the public welfare, but only so if their object is constructive, that is, to find a way out of the situation, to better conditions, and not destructive in character leading to only greater conflict of thought and still greater chaos.

Public discussion calls for real leadership, thoughtful, sane and constructive. It is not the man who shouts the loudest, who berates everybody and everything, who calls for drastic action against this or that law or institution, who is the real friend of the country or of the people for whom he professes to be most sympathetic. This class of individual always comes to the front when men are discouraged and feeling in a more or less desperate mood. He does not attempt to appeal to their reason, but to their feelings and passions. He is not a true and safe leader, but a man bent on destruction, and generally quite incapable of advancing any sound constructive policy that is likely to be productive of good.

Attempts by agitators to type to type the feelings and passions of people, in a word, to seek to capitalize upon the hardships which people may be temporarily undergoing, should not only be frowned upon by the stalwart, right-thinking men and women of this country, but these last mentioned men and women, who are and always will be the real backbone of any country, should not hesitate to speak out boldly in opposition to the unkind and unwise advice and actions of these trouble-making individuals. Newspapers contain reports of meetings in different parts of the country at which, despite the protests and opposition of the more intelligent and far-seeing people present, resolutions are adopted demanding the adoption of certain policies and the carrying out of certain lines of action. If carried into effect, instead of bettering conditions would only serve to prolong existing difficulties and make them infinitely worse. Section proposals, threats of boycotts, defiance of law and resistance to law officers, all may add fire to flames already burning. They mean more, not less trouble and suffering. They contain no element of remedy.

In China, or in any other country, where a revolution may still be the only method of successfully achieving reforms, and in the present world-wide depression, the expedient of revolution has been resorted to in these countries, but whether conditions will be bettered thereby is the matter of the future. But in Canada, Great Britain, the United States, the people enjoy democratic political institutions which place the power of constitutional action right in their own hands. If present national, provincial or municipal policies are not sound and in the best interests of the masses, then the people themselves can right them. They may not be able to immediately correct all their economic difficulties, because in this world no one nation can govern its own economic conditions, much as it may strive to do so. But it can itself adopt those policies which it believes are best calculated to ease its difficulties, solve its problems, and advance the welfare of its people, not of one class or section alone, but of the people as a whole.

It is to the evolution of such policies that the thought and energies of people should now be devoted; not in following blind leaders of the blind who would tear up and destroy on the vague promise that they will bring about a new order, but in building up something different, but in explanation of the exact nature of which they are so delightfully indelicate.

In conclusion, let it be repeated that there are times that test men. There are times that call for cool heads, clear-thinking, not for wild acts and a multitude of untold troubles.

## Pensions for the Blind

**Saskatchewan Body Requests That Federal Government Be Asked To Take Action**

To ask the provincial government to petition the Federal Government for pensions for the blind is Saskatchewan, a delegation of members of the advisory board of the Canadian National Institute for the Blind met Premier Anderson at the provincial buildings, Regina, recently.

The delegation to the Saskatchewan Government is a result of the action taken by the Manitoba Government at its last session when they received a similar request for pensions for the blind in Manitoba from the Manitoba division of the institute.

The Saskatchewan delegation was composed of members of the advisory board of the Canadian National Institute for the Blind in Saskatchewan, assisted by Captain Baker, general secretary for the institute in Canada, and Major E. P. Macdonald, general manager of the central west division with headquarters in Winnipeg. The chairman of the delegation was Dr. F. C. Middleton, who is the chairman of the Saskatchewan advisory board.

**Valuable Invention**  
A machine has been invented to fast the toothed of beaverfeats. A dial attached to the blade of the simple but ingenious machine regulates the degree of difficulty which the blade encounters in cutting through the tissue of the nest.

Worry will reduce a person's weight, but few people ever seek that remedy.

Deposits in savings banks in Germany are increasing.

England may change its horsepower tax in automobiles.

## Demanding Federal Assistance

**Ottawa Flooded With Suggestions For Relieving Distress In West**

West  
Resolutions demanding federal assistance for western farmers are flooding into the capital daily, every mail bringing scores of declarations from Boards of Trade, farmers' local and other bodies. The proposals in these resolutions vary greatly but agree in demanding a minimum price to be fixed for wheat by the Dominion.

Cabinet ministers, quite frankly, are amazed at the widespread dissatisfaction obtaining in the west and are at a loss to know what to do in the circumstances.

The resolutions, as a rule, ask for the following measures:

- 1.—Abolition of the gold standard.
- 2.—Payment by parliament of all outstanding debts of farmers on all grocery bills, chattel mortgages, overdue interest and 25 per cent. of all mortgages.
- 3.—Fixing of the price of wheat at anywhere from 70 cents to \$1 per bushel.

The Federal Government regards all these suggestions as entirely impracticable and unworkable and has no intention of granting any relief to the west other than that afforded by the unemployment fund.

## France and Disarmament

**French Nation Would Seek For Security First**

And, for the French of all orthodox schools of political thought, the precedence of security over disarmament, in independent France, is a practice reduced armaments; but the theory that armaments should not be reduced until there is no need for them as unshakable as the rock of Gibraltar. There are plenty of arguments to the contrary, but they do not count. The French can ask whether absolute security is meant—and in that case, as there is no such thing as absolute security, there is an end of disarmament. One can ask whether, if relative security is meant, with what degree of relative security the French would be satisfied, and to that there is no answer. One can argue that France can ask any one of the conditions of security—but the French would only repeat that they would have security first.

Disarmament in the New Statesman.

## Paved Highway Across Canada

**Predicted That It Will Be a Reality Within Ten Years**

Canada's proposed Atlantic-Pacific highway was pictured as a reality throughout the future to delegates attending the annual meeting of the Canadian Association of Tourist and Convention Bureaus at Winnipeg. Mayor Ralph H. Webb of Winnipeg, disclosed that western mayors had been assured by Prime Minister J. B. Bennett, with whom they conferred at Ottawa some time ago, that the Dominion government was prepared to participate in the completion of the highway on a fifty-fifty basis with the provinces.

Mr. Bennett had added at that time; said Mayor Webb, the prediction that within ten years the highway would be paved from the Maritimes to British Columbia.

## Helium Gas

**Western Canada the Potential Source Of Supply For The Empire**

The disaster to the airship R-101 and subsequent discussion about the use of the inert gas helium instead of inflammable hydrogen to provide the lift interest deeply two reports from the British Commonwealth—Canada and Trinidad. At present the entire world supply of the gas is obtained from the United States, and helium will constitute the new supply being constructed there. Prospects are disclosed large potential supply the gas in Western Canada, and dependent on the future of airship policy, there is a likelihood that efforts will be made to recover the gas.

## Demand For Homesteads

**Many Inquiries Received For Information Regarding Vacant Lands In Northern Saskatchewan**

Under the new provincial land regulations, 60 homesteads in northern Saskatchewan were purchased through the Prince Albert land office in November. Indicative of the widespread interest of prospective settlers, about 1,000 copies have been received as to what lands are vacant under the new scheme by the department of the north-western section of the province, in the Hudson Bay Junction, Meadow Lake, and Nipawin areas. Many of the new settlers are from the southern section of the province.

## Valuable Chart Found

A seventy-year-old chart developed from a soil survey in Alberta has been located after being lost for years. J. A. Craig, deputy minister of agriculture for Alberta, announced that the chart, produced for the British government in 1850, had at last been found.

## Appreciates Canada's Action

**United States Attorney-General Says Liquor Smuggling Driven From Canadian Border**

Liquor smugglers have been driven from the Canadian border to the high seas by the Canadian Anti-Export Act, United States Attorney-General Mitchell declares in his annual report issued at Washington.

"The Canadian nation dealt a severe blow to border traffic when it amended its Export Act of May 30, 1930, and outlawed direct clearance of liquor from Canada to the United States," the report says. "The natural result of this restrictive legislation was to drive some additional professional smugglers to the high seas, where their activities would be more likely to succeed. The French province of St. Pierre, Miquelon, which for a number of years has been the chief rendezvous and supply point for the liquor-smuggling fraternity off our eastern coast, has experienced a substantial increase in this for."

"It is also noteworthy that 25 of our vessels to liquor from Canada during the year were British. Vessels of this nationality still predominate in the trade, even though the chief smuggling base has been increased activity in Nova Scotia ports has been observed, because one of the vessels which operate in the smuggling trade out of St. Pierre are Canadian citizens."

"The hampering of the liquor traffic to Canada has already been mentioned. This action on the part of Canada is real evidence of the fact that our nation to cooperate with us in the solution of our smuggling problem and is very highly appreciated."

Twenty-seven thousand seven hundred and nine persons went to jail for violation of the prohibition laws in 1930—5,017 more than in 1929 and 4,238 more cases were pending at the close of the previous year.

"Enforcement of the National Prohibition Act," says the report, "showed improvement over 1929."

## May Go To Mexico

**Doukhobor Colony From Canada Reported To Be Negotiating With Mexican Authorities**

A dispatch from Mexico City says that Peter Verigin and Aaron Sapiro, representatives of the Doukhobor colony of Canada, conferred with the secretary of agriculture regarding the possibility of 10,000 to 20,000 Doukhobors coming to Mexico if the government would help them to acquire land.

Verigin and Sapiro received the support of the executive committee of the National Confederation of Chambers of Commerce, and this body has already made known before the secretary of agriculture.

It was said that if the Doukhobors were to Mexico they would settle in the northern portion.

**Makes Breathing Easy**  
The construction of the air passages and the struggle for breath too familiar experience of asthmatic trouble, combined Dr. J. D. Kellogg's Asthma Remedy is the best remedy for which is known far and wide for its very severe conditions. It is not untried, experimental preparation, but with many years of strong service behind it. Buy it from your nearest dealer.

## Railway Crossing Accidents

**Nineteen Deaths From This Cause Recorded For September**

Deaths as a result of railway crossing accidents in September numbered 19, according to a report issued by the board of railway commissioners. There were 45 accidents besides those killed 70 were injured. By provinces, accidents were: Prince Edward Island, 1; Nova Scotia, 2; New Brunswick, 5; Quebec, 13; Ontario, 10; Manitoba, 2; Saskatchewan, 2; Alberta, 2; and British Columbia, 4. Only three of the 45 accidents occurred at protected crossings.

The total for the month of all accidents in connection with railways was 183, in which two passengers, seven employees, and 41 others were killed.

**Imports From U.S. Lower**  
Imports into Canada during October from both United States and Great Britain showed marked decreases from corresponding figures for 1929, with United States losing proportionately more than Great Britain. Total imports for the month aggregated \$75,358,000, compared with \$115,711,000 in October, 1929, a decrease of \$37,913,000.

Production of aspen and spruce in England is near a record peak.

## Western Horses For Russia

**Saskatchewan Man Receives Order For 2,000 Horses From Soviets**

A sale of 2,000 Canadian horses has been negotiated with the government of Soviet Russia by Alphonse Champagne of North Battleford, Sask., following a business trip to Europe. The horses will be shipped from Western Canada at an early date.

Mr. Champagne formerly sat in the House of Commons for North Battleford, but now devotes his entire time to private business. He stated that he had received numerous offers from the Soviet Union to purchase horses, but the Soviet Union has been completely convinced as the result of his visit to that country, that it found no one government official but the people were friendly to Canada," he said. "Also anxious to further commercial relations between the two countries."

## Artist Travels With Circus

**Dame Laura Knight Produces Paintings That Breathe Of The Big Top**

After travelling with a circus through England during the summer season, Dame Laura Knight has placed her paintings on exhibition in London. They are said to have made a sensation, those of ponies, zebras and elephants being almost sold with colour. Some of the sketches of behind the scenes are particularly vivid and spontaneous. When members of the circus troupe visited the exhibit they gave an acrobatic turn to show their appreciation. The fair artist travelled as a regular member of the troupe and shared their joys and hardships.

Douglas' Egyptian Limestone is especially recommended for spider, or infection of cow's feet, invaluable also in cases of sprains, corns and splints.

## No Permanent Depression

**Bank President Refers To The Soundness Of Our General Economic Condition**

"In this virtuous circle of Canada with its abundant resources there can be no permanent depression," Sir Charles Gordon, president of the Bank of Montreal, stated in his address at the annual meeting of the bank at Montreal. Sir Charles' review of the soundness of the banking and the Dominion during the past year contended that under all the circumstances Canadians could justly congratulate themselves upon the inherent vigor and soundness of their general economic situation.

## Was Weak and Run Down

**Could Scarcely Do Housework**

Mrs. Edward A. Allen, Bensonton, Alta., writes: "I would like to tell you of the great benefit I have received from your Milburn's Heart and Nerve Pills. I was feeling much run down in health, and was so weak that I could not do my usual housework. I would have to lie down in the afternoon for an hour or so. I saw your Pills in the drug store and took a box home with me. I was delighted with my renewed strength. I feel now as if I could do anything. I feel sure they will help her too."

## Postal Business Good

**Over Million Canadian Postage Stamps Used Last Year**

More than 1,400,000 Canadian postage stamps were used last year, and if they were placed side by side they would stretch a distance of 19,750 miles. It was stated in the course of an address by Mr. C. G. Cowan, vice-president of the British American Bank Note Company, printers of stamps for the Dominion Government, at a luncheon at the eighth annual banquet of the St. Lawrence Stamp Collectors' Club of Montreal. About 100,000 stamps were used in the manufacture of these stamps, which were stuck on 1,400,000 envelopes with thirty-five tons of glue.

An excellent protection against worms can be got in Miller's Worm Powders. These powders are used in the intestines of infants, and are also used in the manufacture of these stamps, which were stuck on 1,400,000 envelopes with thirty-five tons of glue.

## Report Is Denied

**No Zimbaro Planned On Grain Shipments To Vancouver**

Speaking for the Canadian Pacific Railway, there is no intention under the present and immediately prospective conditions to place an embargo on grain shipments moving to the company's line of coastwise. This statement was made by W. M. Neal, general manager, Canadian Pacific Railway, western line, in connection with an item appearing in the press predicting "strong possibility" of the railway declaring a grain embargo in British Columbia.

## What Science Has Done

Science has changed the whole lot. Nowadays if a man has a pain in his right leg or a twitch in his left arm or a set of slightly twisted eyes, he is off to the dentist for him. His teeth come out—painlessly—and their room and place is taken by a handsome set of Crown Derby that produces pain only in the pocket.

## Relieve Your Cold with Minard's Liment.

**Older Than The World**

A modest Scotchman, in speaking of his family, said: "The Douglas family is a very old family. This family, this line runs back into antiquity. We claim long far back in time, but it's long long way back and the history of the Douglas family is recorded in five volumes. In the middle of the third volume, in a marginal note, we read, 'About this time the world was created.'"

## Canada Will Come Through

eminer Has Weathered More Severe Depressions Than Present

One Today, many business men wonder if Canada has not suffered a major set-back in its long term development as a result of the current depression. As they survey our very apparent problems in regard to wheat, newspaper, metal prices, etc., they are convinced that the difficulties this country faces are no comparables as to be insurable within any short period.

If many people seriously look to this view let it be urged upon them that they study Canada's history over the last hundred years. They will find that in the last hundred years, Canada has emerged without permanent scar upon its economic fabric from 15 periods of depression in addition to the present one, and that, of these, at least seven were more serious than this one.

Canada gained reputation as a permanent in a period of depression. At the time Lord Durham made his report, Canada was in the midst of a serious crisis, and there were those who thought the colonies were doomed to divide to practically nothing.

Canada was born in a period of depression. It would be hard to conceive greater depths of despair than were reached in Canada just prior to the joining up of the provinces.

Again the Canadian Pacific Railway, the first great transcontinental railway of the country was constructed during a period of depression, and in 1882 the money to pay for the axle grease was not visible on the horizon.

The twentieth century, we are told belongs to Canada, and yet this century entered that century in a period of depression.

Through the generations, Canada has come through crisis much more serious than the present depression in business. The difficulties of the moment do not represent any major setback in the forward sweep of Canada's prosperity.

## Creates Better Methods

Business Practices Has Shown Improvement Due To Competition

Competition and adversity have some remarkable effects in improving business practice. Gramophone interests, threatened by the increasing popularity of the radio, made great changes in their sound producing machines, until now a normal unit of sale is gramophone and radio combined.

Coal dealers have found their sales for domestic use reduced by the rapid spread of both oil and of central heating for houses. One of the chief reasons for the householders abandoning his old furnace for methods admirably more easily was the dirt and dust of coal.

New coal dealers offer dustless coal, secured by treating the coal with a powder which absorbs moisture and prevents dust from rising. Perhaps in time this will enable the coal dealer to make ash dustless.

## Services Are Free

Because so many persons were unable to find addresses they were seeking in two suburbs on the outskirts of Toledo, Hyatt Hicocks, veteran postman, has volunteered his services as guide. He has printed cards announcing this fact and every day when his regular work is done goes to the station. One day he had 49 customers during this tour. His services are offered gratis.

## Live Fox Exports

The export of live foxes from Canada to Germany continues to increase in number. During 1928 a total of 892 animals, valued at \$280,552, was shipped from the Dominion, as compared with the previous year's exports of 875 animals valued at \$100,860.

"The Souths have been married a month and have not quarrelled once." "Is it possible? Whose fault is it?"—Karlensons, Oslo.

W. N. U. 1887

## Speeches Are Shorter

Radio Has Done Much To Curtail Elaborate Oratory

It has been remarked during the Imperial Conference in London, England, that the speeches were shorter, even than they had been at the Conference of 1911. A general treaty of the current oratory is to pack its sentences close. The accountant of radio speaking has accumulated statements—very the most voluminous of orators—to covering the whole of their party's policy in half a dozen sentences of perhaps only fifteen or thirty minutes each.

What will be the effect of this shortening of speeches? Will the flowers of eloquence cease to grow if they are crowded into too small a space? Sir Arthur Currie-Cochran in a Cambridge lecture once examined a number of famous places of prose eloquence, and found that the flashing burst of rhetoric, the inspired phrases, came only after long preparation and slow, elaborate accumulation. Such was notoriously necessary in achieving his effects.

The impressive and sensational first speech of Richard B. Sheridan in the House of Commons in 1789, occupied about five hours in delivery. The general practice of orators in the House of Commons is to reach the greatest heights of eloquence in a length that in a short speech. But it also is suggested that eloquence, even of the most exalted kind, finds no fatal enemy in brevity. Only two examples need be quoted: The most famous speech of Pericles, at the battle of Salamis; and that of Lincoln at Gettysburg; and neither took more than five minutes to deliver.—Christian Science Monitor.

## Pin Hopes To Parasites

Using Parasites For The Control Of Insect Pests

There is an old saying, "It takes a little to kill a thief." The Entomological Branch of the Dominion Department of Agriculture got one better, than the old saying, "It takes a little to kill a thief." The results of recent work in the use of parasites for the control of such important agricultural pests as the wheat stem sawfly, the corn borer, the Oriental peach moth and the larch sawfly are reported as being very promising indeed. Parasites have been introduced into Canada from several countries and have shown their effectiveness in attacking and eliminating the host pest; it only remains to determine whether or not they can be used to the advantage of the Canadian farmer; if they do, untold benefits to Canadian farmers will result.

## Why Eat Beef

National Funders For Meat Based Upon A Sound Scientific Foundation

In a new book about to be published by the Meat Grading Service of the Federal Department of Agriculture the question, "why eat meat?" is answered in a most natural fashion. For meat is based upon a sound scientific foundation, as well as not only the most nutritious food for the proper growth and development of the human body, but it supplements to a great extent the value of many of the nutrients found in grains and vegetables. Beef is a very valuable source of protein, the tissue building element in food; heat and energy are supplied by the fat; and substantial quantities of mineral salts and vitamins are supplied in a form which is really assimilable.

## Know His Men

The very nervous married couple stopped for lunch at a little wayside hotel.

"During the meal the manager was over-attentive, and the young husband began to angry."

"For about the tenth time in a quarter of an hour the manager came to their table."

"And what can I do for you now?" he asked.

"Some honey-moon for us!" snapped the young husband.

"Honey-moon?" echoed the manager. "Whatever does that consist of?"

"Just lettuce alone," came the reply.

## Cattle Shipped To England

A shipment of two, three and four-year-old steers, numbering 205 head, left Calgary the other day for Manchester, England. The consignment, which was the second to leave the west during the past few weeks, was collected and shipped under the supervision of the Dominion Department of Agriculture.

## Power Of A Poem

Elizabeth Barrett Browning's "Cry of the Children," one of the most poignant poems in the English language, stopped child labor in the textile mines almost instantly.

## Praise For Canadian Writer

Studebaker Lewis Pays Tribute To Morley Callaghan

Found, Mr. Studebaker, to say "Thank you" in Swedish for the Nobel prize, Studebaker Lewis celebrated the brief call at Halifax by declaring that "there are no doubt several Studebakers," paying a tribute to the work of Morley Callaghan, Canadian writer, and leaving \$25 in the hands of a reporter to assist a Norwegian laborer, III in Halifax, to return his home.

"I am surprised that 'Canadians' have not made more of Morley Callaghan," said the tall red-haired creator of Main Street, Dabbist and Gentry. "He is a coming man, and he has published a number of things which should have attracted attention, particularly in his own country."

Asked if Elmer Gantry was a purely literary character or if he had ever known a clergyman who might have furnished the principal character for the book, Lewis replied: "No doubt there are several."

The letter which drew the \$25 and a request for investigation from Mr. Studebaker was signed by the late "Dreilingman." It was one of many received by the author since the publication of the novel, and told him the only chance for the writer's life depended on Norwegian mountain air. The writer could work his way across, but required \$24 "for the wife, it is a freight boat."

## Government Grades On Poultry

Canadian Standards For Dressed Poultry Set Out In Detail

The "government grades" as the "Canadian Standards for Dressed Poultry" are popularly known, comprise two classes, "Milked" and "Selected." These are further divided into three grades in the class "Milked" and five in the class "Selected." These are: Milked Special, Milked "A," and Milked "B," in the Milked class; and "Selected Special," "A," "B," "C," and "D," in the Selected class. Federal regulations define the class "Milked" in the following terms: "All poultry to qualify for the class Milked must show a white color in the deposits of fat, and in which the skin and flesh must be soft, in texture, showing evidence of the birds having been crate-fatted or pen-fatted for a sufficient length of time to soften or kill out the muscles."

The definition for the class "Selected": "This class shall include all poultry that does not show white color in the deposits of fat, and in which the skin and flesh must not show evidence of milkfading."

Pleats Compose Orchestra Believed to be the only orchestra of its kind in the world. Tom Truesdale and his Musical Aviators, which broadcast from the Aviation Grill in New York daily, except Sunday, is composed entirely of licensed airplane pilots. The 11 members are real musicians and use their talents to pay their tuition through flying school.

The London Zoo has acquired a King Cobra 16 feet in length, which is able to raise its head and neck eight feet vertically from the ground.

Walters—"Oh, I'm sorry I spilled water all over you." "That's perfectly all right. The suit was too large, anyway."

There is a storekeeper in the midtown district of New York, who has put up the following sign behind his counter: "Don't ask me how my business is for I am too busy doing it to discuss it during business hours. Mind your own business."

He explains that so many of the storekeepers in his neighborhood are so well as clients keep asking, "How is business?" and gossip about their own good and bad business that he figured the best time for all concerned would be more profitably explained. Hence the sign.

Waitress—"Oh, I'm sorry I spilled water all over you." "That's perfectly all right. The suit was too large, anyway."

## Removes Personal Interest

Not Desirable To Have Farms Too Highly Mechanized

The Toronto Mail and Empire says: The people of Ontario, surrounded by small farms, and familiar with their advantages, learned with dismay of the so-called "mechanization" of the prairie farms in the west. It was predicted that the use of mechanical appliances would lead to an increase in the size of farms, a decrease in the number of farm laborers and a disastrous disturbance of the present balance between town and country. But a different view is taken in an article contributed to the Manitoba Free Press by Mr. C. M. Hamilton, a member of the board of grain commissioners of the province, and a former of agriculture for Saskatchewan, and a farmer of great experience.

Praising aside local and sentimental considerations, Mr. Hamilton recognizes that the question will be solved on a cold economic basis. Can large farms be operated more economically than small ones? and his answer is:

"I am disposed to think that there will be a tendency to increase somewhat the size of the farms on the open prairies of western Canada. When a unit has been created which can employ machinery, and modern machinery, say, a 15-30 tractor, or 28-hp. unit, a combine, if you will, and other agricultural machinery of the same class, then I can see no economy, in most cases, in multiplying the number of such units. To do so would remove the personal interest of a great many engaged in agriculture. I think we all realize the importance of a farmer having a personal interest in the cultivation of his land, the breeding and care of his live stock and generally, the building of a farm home."

"I cannot conceive of large mechanized farms stocked with hens, poultry, cattle, hogs and other live stock of live stock."

Mr. Hamilton points out that western Canada has hitherto depended too much on one crop, grain, and that what can be most cheaply grown where the farmer is deriving his living from side lines in mixed agriculture, and he suggests that the provincial governments and colleges of agriculture should endeavor to determine the most economic unit in farm management.

Wanted Too Much Time New York Storekeeper Found Customers Were Unprofitable

There is a storekeeper in the midtown district of New York, who has put up the following sign behind his counter: "Don't ask me how my business is for I am too busy doing it to discuss it during business hours. Mind your own business."

## For Measuring Hay

Quartermaster's Rule Is Most Accurate Method Known

The quartermaster's rule for measuring hay is the most accurate of any now used, and is recommended by the Colorado Agricultural College and the U.S. Department of Agriculture.

This rule is 96 per cent. accurate on the average while other rules commonly used are only 74 to 83 per cent. correct, according to actual weights of hay in a large number of stacks.

Investigations which led to the recommendation of the quartermaster's rule were conducted by several state experiment stations and the department of agriculture. These investigations are being continued and a still more accurate rule for measuring hay may be formulated as a result of this research work.

The quartermaster's rule is as follows: Add the width of the stack and its "over," divide the sum by 4, and multiply this result by 16. The result is the number of tons in the length of the stack will give its volume in cubic feet.

The investigation on the number of cubic feet of hay required for a ton under various conditions has not been exhausted. The results are being obtained approximate figures by allowing 512 cubic feet to represent a ton of timothy or alfalfa which has been in the stack from 30 to 90 days, and allowing 422 cubic feet when the hay has been in the stack over 90 days.

For prairie or other fine grass hay, 422 cubic feet represent a ton when the hay has been in the stack over 30 to 90 days, and 343 cubic feet when it has been stacked over 90 days.

Local citizens of the Dominion may rejoice in the full measure of stored grain, and have to be thankful while they may possibly regard their independence in domestic matters, they will nevertheless continue to regard Britain as their mainstay in Imperial defence. It is very nice and soothing of Mr. Thomas to talk about the equality of the Empire, with Britain as one of the Dominions, but until the other Dominions bear a greater proportion of the cost of the Empire it would be unfair to regard the Mother Land as having no more say than the rest of the commonwealth.

It is very nice and soothing of Mr. Thomas to talk about the equality of the Empire, with Britain as one of the Dominions, but until the other Dominions bear a greater proportion of the cost of the Empire it would be unfair to regard the Mother Land as having no more say than the rest of the commonwealth.

Loyal citizens of the Dominion may rejoice in the full measure of stored grain, and have to be thankful while they may possibly regard their independence in domestic matters, they will nevertheless continue to regard Britain as their mainstay in Imperial defence. It is very nice and soothing of Mr. Thomas to talk about the equality of the Empire, with Britain as one of the Dominions, but until the other Dominions bear a greater proportion of the cost of the Empire it would be unfair to regard the Mother Land as having no more say than the rest of the commonwealth.

WORLD HAPPENINGS  
BRIEFLY TOLD

"Totals," claimed by her owners to be the "world's oldest cat," is dead at Winnipeg. She was 23 years old. There are no survivors.

The net value of Britain's national wealth in 1934 was \$225,000,000 according to Sir Josiah Stamp, noted economist, who in 1934 put the figure at \$71,500,000,000.

The total estimated value of the prairie provinces is \$7,380,000,000, according to a statistician issued by the industrial development board of Manitoba. This is 23.51 of the Canadian total.

The United States and France are shown by the bulletin of the Federal Reserve for November to control the world's supply of gold. Together the two countries hold about 60 per cent of all yellow metal.

Defending his country's policy in India, Sir Ronald Lindsay, as guest of honor at a dinner in New York called the relations between Great Britain and India the most pacific in their history.

Juvenile immigration into Canada will be limited to actual dependants, it was decided at a conference attended by federal and provincial government representatives and those of interested societies.

The Royal College of Physicians and Surgeons of Canada has a constitution, a year ago, now has a constitution, set of by-laws and a code of ethics, all of which have been ratified by the fellows of the college.

A hotel is to be opened in Ottawa by the Canadian Legion to provide shelter for veterans. The Great War "in poor circumstances." It will have 50 to 100 beds and a free lunch counter.

Eighty-eight years of age, "Jerry" Robinson, one of Winnipeg's most noted pioneers and business men, died at his home, following an illness of only two days. He succumbed to an attack of pneumonia.

Vice-Admiral Sir Arthur Kipling Watson, present commander-in-chief of the China station, has been appointed to succeed Admiral of the Fleet, Sir Roger Keyes, as command-in-chief at Portsmouth.

Prince George Bibesco, of Rumania, was elected president of the International Aeronautic Federation, succeeding the Count de Vaux, who was killed in an aeroplane accident in the United States last fall.

Germany has made a demand before the preparatory disarmament commission that a general disarmament conference be called for November 2, 1935. No discussion on the suggestion took place.

The location of 60 families on 14,000 acres of good land between Marville and Oyster River on Vancouver Island, one of the largest land settlement projects ever undertaken in British Columbia, is under consideration by the C.P.R.

Between 10 and 15 per cent of northern Saskatchewan's wheat, still untreated, according to a report issued by the soldier settlement board at Prince Albert. Thousands of acres of grain will remain under mold till spring.

## Liner Stopped To Aid Islander

As the liner "Island" was passing lonely Pitcairn Isle, in the Pacific, it received an appeal for help for a man dying from lockjaw. The liner was stopped, and the ship surgeon was sent ashore in a small boat. He treated the man, who rallied, and gave the islanders instructions as to nursing and treatment before returning to the liner.

## Tree Seed Planted From Air

The forestry department of Hawaii has been engaged this season in planting tree seed by aeroplane. An U.S. army plane was used on the job. It was flown over a large cordon of trees and 1,000 pounds of seeds were dropped from an elevation of 2,000 feet. Mixed seed was used.

## Wine Red Canton Crepe with Eggshell Falls Crepe and Black Crepe

Wine red canton crepe with eggshell falls crepe and black crepe are now available in models for all-day wear. This pattern may be obtained in sizes 16 to 20 and 22 to 42. It is ready for immediate delivery. It has hand cut.

Send 25 cents (in stamps or cash) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

## Canada's Fishing Grounds

Most Extensive In World and Yield Is Exceptional In Variety

"The Dominion's fishing grounds, both sea and inland, are perhaps the most extensive in the world and they yield food fishes in exceptional variety. Of prime natural quality, these fish are marketed in numerous different forms — fresh, frozen, canned, dried, smoked, etc. — by an industry whose processing methods have kept pace with the most approved scientific practices. As a result, fresh or prepared fish of the first quality are always available to the Canadian consumer. It is also to be said that in many cases fish foods are cheaper than other food products."

An indicating the importance of the fishing industry to the country, a statement of the Department of Fisheries points out that the industry represents an investment of some \$62,000,000, and is the direct source of livelihood for some 60,000 Canadians and their dependents as well as an indirect source of employment for a large number of workers in various industries in all parts of the Dominion. Annual fisheries production now runs between fifty and fifty-five million dollars and the fisheries add approximately \$38,000,000 to the country's export trade every year.

The Dominion's fisheries, however, are capable of much further development and increasing popular attention to their exploitation, sound fisheries must make the fishing industry a still greater contributor to the economic strength of the Dominion.

## Winnipeg Newspaper Union

(By Eva A. Tingey).

Winnipeg has dropped about one per hundred thousand population per year or for 50 to 60 years ago. During the same interval the sanatorium treatment beds have increased from 1,000 to 7,000. It is interesting to note how this has been accomplished. Canadians are fortunate in having an excellent organization working on their behalf in this regard—the Canadian Tuberculosis Association, which organization has for many years been very active in the front of the battle against this disease. They have carried the warning against tuberculosis right to the minds of the general public. They have waged an educational campaign against it in all parts of the Dominion. That they have done more than merely to warn and to alarm. They have been responsible for many cures and for a very great deal of prevention. One of the most interesting phases as well as the most needed of their work is the branch of the organization working by physical medical examination. People in whole districts are frequently examined for signs of incipient tuberculosis and many cases are found of people who are afflicted with tuberculosis in its incipient stage. Since the disease at this stage is not certainly and permanently curable the Association is thus responsible for the saving of many lives and the prevention of much misery.

In this connection the Annual Christmas Sale should be mentioned. This sale which reaches the support of all classes of citizen serves a valuable and two-fold purpose. First of course it raises money. This is used for local committees to maintain diagnostic and home visiting nursing services. Secondly the annual seasonal campaign of the Christmas Sale gives the public much needed information about the work and the need for the work.

"The type of citizen who buys Christmas seals" an official of the organization recently said, "is not the kind to let his brother down."

Fostering Home Industry

Saskatchewan Caught Fish To Be Used In Provincial Institutions

With a view to fostering the fishing industry in the northern part of the province, the government is substituting Saskatchewan-caught whitefish in the mental hospital at Weyburn, the industrial school, Regina, and the old folks home, Weyburn.

The government has also written to the secretary of the Anti-Tuberculosis League suggesting the introduction of the Saskatchewan-caught whitefish in the sanatoria at Port of Qu'Appelle, Prince Albert and Saskatoon.

Ranches Change Hands

Ranches totaling 60,000 acres in southeastern Alberta have recently changed hands in exchange for cattle. Washington property, the amount involved being reported as \$1,500,000. The ranches were formerly known as the "W" or "Jim" ranch. The new owners intend stocking the land with pure bred cattle and polo ponies.

Teacher: "Name some of the most important things existing today, which were not known one hundred years ago."

Pupil: "You and me!"

Above are shown three noted medical men, who attended the annual meeting of the Canadian national committee for mental hygiene in Toronto. (1) Dr. A. H. Denolgue, general director of hospitals for insane in province of Quebec; (2) Dr. A. Grant Fleming, professor of preventive medicine and public health at McGill University, who has been appointed medical director of hygiene council to succeed Dr. C. H. Hickey; and (3) Prof. J. M. MacLachlan, director of department of philosophy at Edmonton.

## About Tuberculosis

Educational Work To Combat Disease Waged In All Parts Of The Dominion

Great encouragement has been given in the last ten years to those people who believe that much of our disease can be prevented.

"Every doctor and almost every enlightened layman holds this belief and the encouragement which the last ten years has brought to these people is evident in the success which is crowning the efforts of these people who are fighting that dread destroyer, Tuberculosis."

The death from all forms of Tuberculosis has dropped about one per hundred thousand population per year or for 50 to 60 years ago.

During the same interval the sanatorium treatment beds have increased from 1,000 to 7,000. It is interesting to note how this has been accomplished. Canadians are fortunate in having an excellent organization working on their behalf in this regard—the Canadian Tuberculosis Association, which organization has for many years been very active in the front of the battle against this disease.

## The Spirit Of The Red Cross

What The Junior Red Cross Is Trying To Accomplish For Peace

When the great conference of the world's Red Cross Societies met in London, England, with the Duke of York as Chairman, they saw at the Scala Theatre, by means of a play that the Junior Red Cross is trying to do in the world for peace, and health, and happiness.

In the words of the Spirit of Red Cross the trinity of aims was well expressed as follows:

I am the Red Cross; who am known of all men

To be merciful and compassionate And of my fellowship are such as would find service

The work and the suffering. Many there be of my servants who To Honour and Reason.

But the most part their reward lies hidden

In the hearts of men. And now call I the children to be my company.

For they, too, can be helpers, Following after their fashion in my footsteps

And weaving the threefold thread Of Health, Help and Friendship.

Bar Convict Labor Goods

United States Takes Action To Prevent Importation Of This Trade

The treasury promulgated regulations against the importation of convict made goods, while a witness was being taken in the House Committee investigating committee how prisoners fare in Soviet camps.

The regulations require importers and shippers to show that imports from all countries are not produced by convict labor.

Russian goods have figured in several recent hearings at which the treasury was asked to bar certain products, but in announcing the regulations, Assistant Secretary Lowman said they were "not directed against Russia, but against everybody." They were issued under a law which required importers to post bond and submit a certificate of origin showing unpaid convicts did not manufacture the articles.

Many more buildings are being erected in Canada than a year ago.

## Demand For White Spruce

Is Most Important Commercial Tree Native To Canada

White spruce is the most important as well as one of the most widely distributed of the commercial tree species in Canada. It is found from the maritime provinces to British Columbia, and as far north as the mouth of the Mackenzie river within twenty miles of the Arctic ocean. It is one of the most northerly growing of Canadian trees. The white spruce is one of five native spruces. It is estimated by the forest service of the Department of the Interior, that the total spruce stand, all species, in Canada is about 60,000,000 cubic feet of timber, or about 30 per cent of the total softwood stand. The estimate of white spruce stand is about 20,000,000 cubic feet, or one-third of the total spruce timber standing.

White spruce probably forms the greater part of the spruce lumber on the market, and its use has increased in recent years with the growing scarcity of white pine. It is used in great quantities for the manufacture of building materials. Large quantities are used as siding, flooring, and roof sheathing, as well as for the manufacture of sash, doors and house trimmings. It is one of the leading woods in millwork of all kinds, and is used in great quantities in the amount of lumber produced annually, and it now ranks second only to Douglas fir. The average annual cut of spruce lumber is approximately 1,180,000,000 feet B.M., with a value of \$32,000,000.

## Copyright Act

May Decide To Seek Amendment To The Existing Act

Churches, exhibitions, bazaars and other charitable or public organizations may be obliged to pay thousands of dollars for performing rights to music they use unless an amendment is made to the Canadian Copyright Act.

Such was the view put forward at the annual convention of the Canadian Association of Exhibitions held in Toronto recently. The association decided to consider the sending of a delegation to Ottawa to lay a request for an amendment before the government.

## An Ice Cream Tree

One tree in the greenhouse of Mrs. M. A. Hora at Menasha, Tenn., is very popular with the children. It bears a fruit that "tastes like strawberry ice cream and looks like corn." It takes the ears 38 months to ripen, according to Mrs. Hora, who got the tree from a St. Louis florist six years ago. The berries are soft and mushy and very rich.

## Done By Advertising

The will of the late Honorable P. C. Larkin, amounted to \$3,500,000, the bulk of which was left to his family. As Mr. Larkin started as a tea merchant in a very humble way, his success is a striking example of what can be achieved by energy, enterprise and advertising. From practical obscurity he left a name that is known throughout the entire world.

## May Tax U. S. Publications

Federal Government Likely To Impose Some Form Of Duty

The Montreal Gazette published the following dispatch from Ottawa.

"A determined effort to lessen what amounts to unfair competition for Canadian manufacturers is almost certain to be made by the present government in its revision of the tariff for the coming session, by imposing some form of duty against periodicals entering Canada and allowing a large amount of advertising to be exempted. Such a move would be aimed at large weekly publications from the United States, and it is expected that the duty will be imposed on a percentage basis, and that the publishers still be required to furnish advance copies of their publications to the department of national revenue for purpose of appraisal."

## Bounty Adds Butter Import

Reason Australia Can Compete With Canadian Product Says Caulder

The reason Australian butter can compete on the Canadian market is because there is a bounty of about five cents on every pound exported, thus giving the Australian exporter a price-advance according to Mr. J. A. Caulder, former president of the National Dairy Council of Canada.

Mr. Caulder pointed out that for every four pounds of butter produced in Australia, one pound was for export.

The speaker pointed out that 60 per cent of the Canadian West was suitable for dairy production, and he strongly recommended introduction of more mixed farms in the West to overcome the present wheat depression.

## Plotting Against Soviets

Reports a Stale Leon Trotsky Is Directing Operations

Despatches to the Telegraphs Union from Kovno, Lithuania, recently said the OGPU (Soviet secret police), had discovered an elaborate plot by anti-Communist factions in Lithuania with headquarters at Taganrog.

The report said the plotters were actually the direct agents of the exiled Leon Trotsky, who was reported to be at Istanbul, with the object of overthrowing the Stalin government.

## Solid Witnesses

The practice of establishing concrete monuments—known as fundamental bench marks—by the Geodetic Institute of Canada, Department of the Interior, in the course of its work in taking the elevation of the country above sea-level was inaugurated in 1925.

## New Winnipeg Industry

A new industry has come to Winnipeg from International Falls, Minnesota, the Reichert Auto Body Works having purchased a building for the establishment of their business.

## Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

**WINDOLITE**  
THE ORIGINAL GLASS SUBSTITUTE  
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute allows the full sunlight to enter, in light and flexible, easy to cut and fit, cluding the health-giving Ultra-Violet rays, which do not penetrate ordinary glass, keeps out cold and wet, but glass.

CUT DOWN  
YOUR LOSSES  
BY INSTALLING  
WINDOLITE

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are raised from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

**HIGH COMMISSIONERS' STATUS DECIDED UPON**

Office of the Secretary of State for the Dominions announced Tuesday that His Majesty has directed that the High Commissioners of the Dominions in London, and also the High Commissioner for India will rank immediately after the British Secretaries of State on all ceremonial occasions other than those when ministers of the Crown are present from the dominions.

This announcement implements the decision reached at the Imperial Conference regarding the precedence to be accorded to the High Commissioners.

Position of the dominions' representative in relation to a minister of the Crown visiting the United Kingdom from that dominion remains unaltered, the minister being given precedence immediately before the High Commissioner concerned.
